

(Unclassified// FOUO)

CSWC Operational Period Summary

1800 May 08 2018 to 0600 May 09 2018

Cub Scout Pack 1533's visit to Roseville Fire Station 7. The pack learned about fire and life safety topics including Stop, Drop and Roll, when and how to call 9-1-1, home escape routes, and smoke alarms. Learning about these safety topics helped the scouts earn their "Safe and Smart" belt loop.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

Strong Northerly Winds With Low Relative Humidity (RH) Friday and Saturday

A low pressure trough will replace high pressure over the region on Wednesday and Thursday. A few light showers are possible in far Northwest California through early Wednesday. Temperatures will be near normal Wednesday, and back up to 5-8 degrees above normal Thursday. A northerly downslope surface wind pattern will begin on Thursday, peak on Friday and early Saturday, then continue at lighter speeds until midday Sunday. Peak gusts of 35-40 mph will surface across wind-prone areas from the western Sierra slopes to coastal mountains Friday through early Saturday. Temperatures will be 8-12 degrees above normal with Minimum RH 10-20% Friday to Sunday.

SOUTHERN CALIFORNIA

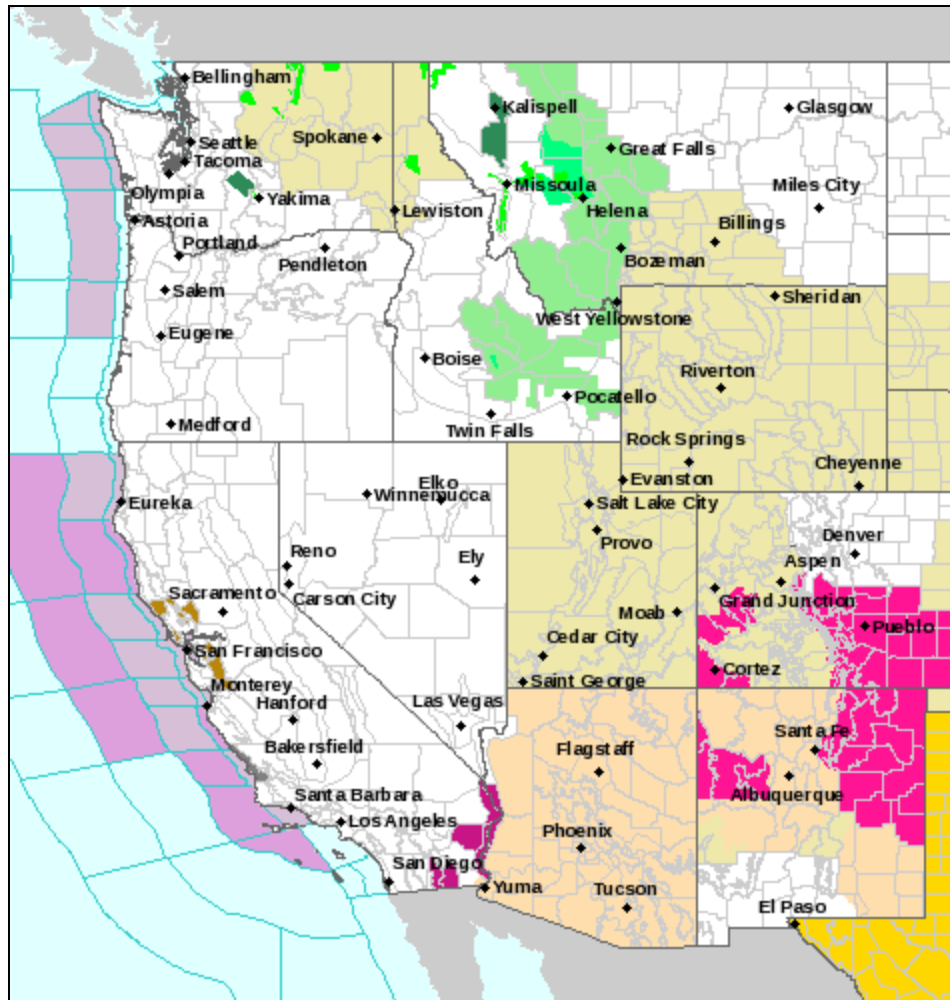

Gusty north winds at night across Santa Barbara County and the Grapevine Area through Wednesday

Strong westerly afternoon winds through the desert passes Wednesday through Friday

There will be little change in the weather through Wednesday as a ridge of high pressure remains over California. Temperatures will be around 10 degrees above normal away from the coastal areas, with upper 60s and 70s across the mountains and 80s to low 90s in the valleys. Minimum humidity will be mainly in the single digits and teens away from the coastal areas. North winds of 15 to 25 mph with gusts to 40 mph will surface across Santa Barbara County and the Grapevine at night through Wednesday. An area of low pressure will form over the Pacific Northwest causing temperatures to cool a few degrees and humidity to increase to 15% to 30% away from the deserts Thursday. This low pressure area will drop into the Great Basin Friday and then remain nearly stationary through early next week causing near to a little below normal temperatures and fairly high humidity away from the deserts. Afternoon west winds of 20 to 40 mph with gusts to 60 mph will surface across the desert passes Wednesday through Friday. The marine layer will become deep Friday through early next week, with morning low clouds and fog making it over the lower coastal mountain slopes. Isolated afternoon thunderstorms will be possible over the Sierra Crest Saturday through early next week.
